

Bertin Exensor signs Framework Agreement with Swedish Defence Materiel Administration (FMV), the Finnish Defence Forces Logistics Command, The Danish Ministry of Defence Acquisition and Logistics Organisation (DALO) and The Norwegian Defence Materiel Agency

Bertin Exensor, a Swedish subsidiary of the French technology group Bertin Technologies, has signed a long-term framework agreement with the Swedish Defence Materiel Administration (FMV), the Finnish Defence Forces Logistics Command, The Danish Ministry of Defence Acquisition and Logistics Organisation (DALO) and The Norwegian Defence Materiel Agency. This agreement enables further deliveries of the Flexnet UGS system, as well as development and adaptation to meet future requirements for Unattended Ground Sensor (UGS) systems.

Bertin Exensor has entered into a new framework agreement with the Swedish Defence Materiel Administration (FMV), the Finnish Defence Forces Logistics Command, The Danish Ministry of Defence Acquisition and Logistics Organisation (DALO) and The Norwegian Defence Materiel Agency for the delivery of advanced Unattended Ground Sensor (UGS) systems. The agreement, spanning 10 years, includes both new equipment and technical system support to strengthen the nations' capabilities in protection, surveillance, and intelligence.

Through this agreement, Bertin Exensor continues to be a long-term and strategic partner to Sweden and its allied partners, with the goal of delivering innovative and reliable sensor solutions for critical defence and security applications.

"For Bertin Exensor, this agreement confirms that our long-term efforts in the field of Unattended Ground Sensors have been well-directed, that our system solutions are highly valued, and that they play a crucial role for the soldiers in the field," says Pontus Agerteg, Head of Sales Nordic at Bertin Exensor.

The agreement covers Bertin Exensor's entire system platform, including advanced sensors and development, as well as training and support to ensure optimal utilisation of the technology for years to come.

ABOUT BERTIN EXENSOR

Bertin Exensor is a world-leading provider of Unattended Ground Sensor (UGS) systems. The Flexnet UGS system, developed by Bertin Exensor, compiles information collected from seismic, acoustic, magnetic, and thermal sensors to detect, classify, and identify potential threats and targets. Flexnet is suitable for both civilian and military applications, such as personnel security, intelligence gathering, reconnaissance (ISR), and surveillance of critical infrastructure and sensitive areas.

Bertin Exensor has 75 employees with facilities in both Sweden and the United Kingdom. Since 2017, the company has been part of the French group Bertin Technologies, a well-known and recognized supplier in the defence and security sector.
